

# PLEASE DIRECT FLOODED HOME AND BASEMENT STORMWATER INTO THE STREET AND STORM WATER SYSTEM

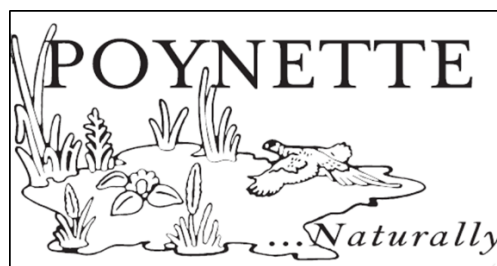

Public storm water drain

## WHY?

Excess storm and flood waters drained into a home waste water drain ends up at the Village Wastewater Plant, which goes through costly and unnecessary treatment and processing. Storm/flood waters can safely drain into public storm sewer drains, which are then deposited into stormwater ponds or other natural drainage features (Rowan Creek).

*Per Village Code II-5.023(2)(a)*
